PACKAGING SUMMIT TOPICS

- Future of Editable installs (12)
- External dependencies (11)
- Strictness of PyPI / pip ~~meta~~ (metadata) (8)
- src/ layout (7)
- Storage of requested/installed extras (6)
- Structured, exchangeable lock file (6)
- Future of python-requires (5)
- Mechanism to upload wheels for other packages (5)
- Warehouse security grant (4)
- PyPA governance (4)
- More dependency categories (4)
- Future grants and funding (3)
- Binary packaging (3)
- Standardized user-provided config (2)
- PyPA communication (2)
- End-to-end pipeline (2)
- Packaging and Python 2 (2)
- PyPI + TUF (1)
- Public API for wheel (1)
- Project workflow (0)
- Mixing system(rpm) + PyPI installs (0)
- nanopack for PyPI (0)

The End
